

# Coronavirus Story

This is Coronavirus. It is a germ that can make people feel poorly.

You cannot see Coronavirus with your eyes, it is very small.

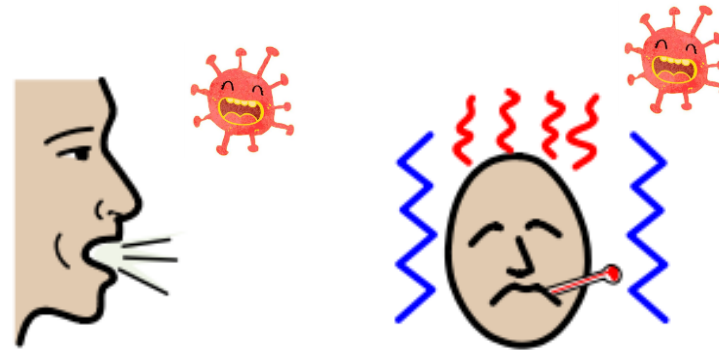

Coronavirus can travel around the world and jump on people's hands.

If people are close together, Coronavirus can touch lots of hands

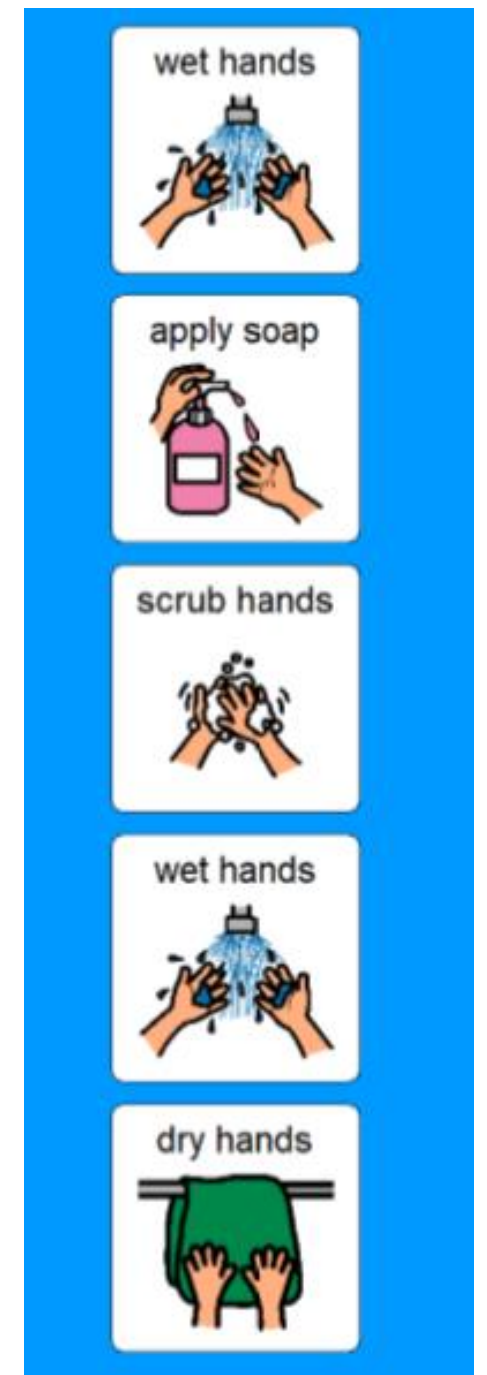

If Coronavirus is on a person's hands, that person might feel poorly.

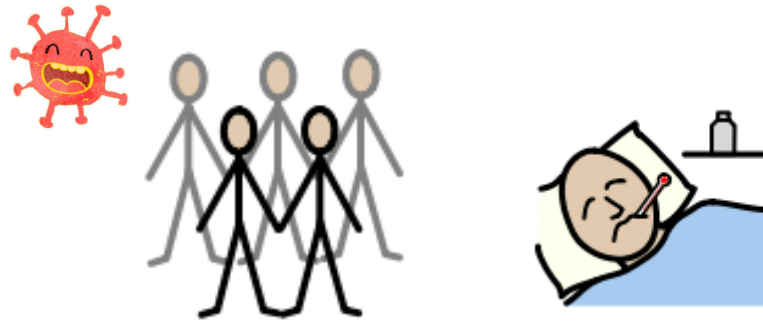

The person may have a cough or a fever

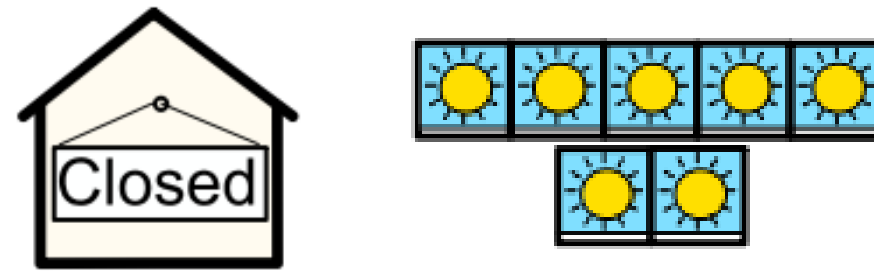

It is important to wash our hands to stop Coronavirus

If a lot of people feel poorly

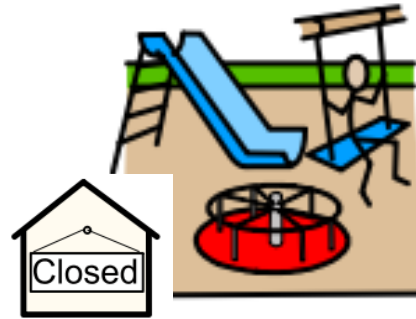

Some places may need to close for a few days

Some of the places that might close are:

Dysart School

The playground

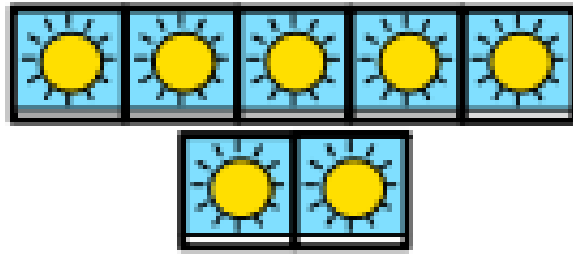

The cinema

If somewhere is closed, it will be cleaned

Cleaning will help to stop Coronavirus

If school closes, you will be at home with your family.

You can do homework, play with toys and do activities with your family

When the coronavirus stops and goes away,

We will be able to visit our favourite places and people again.
