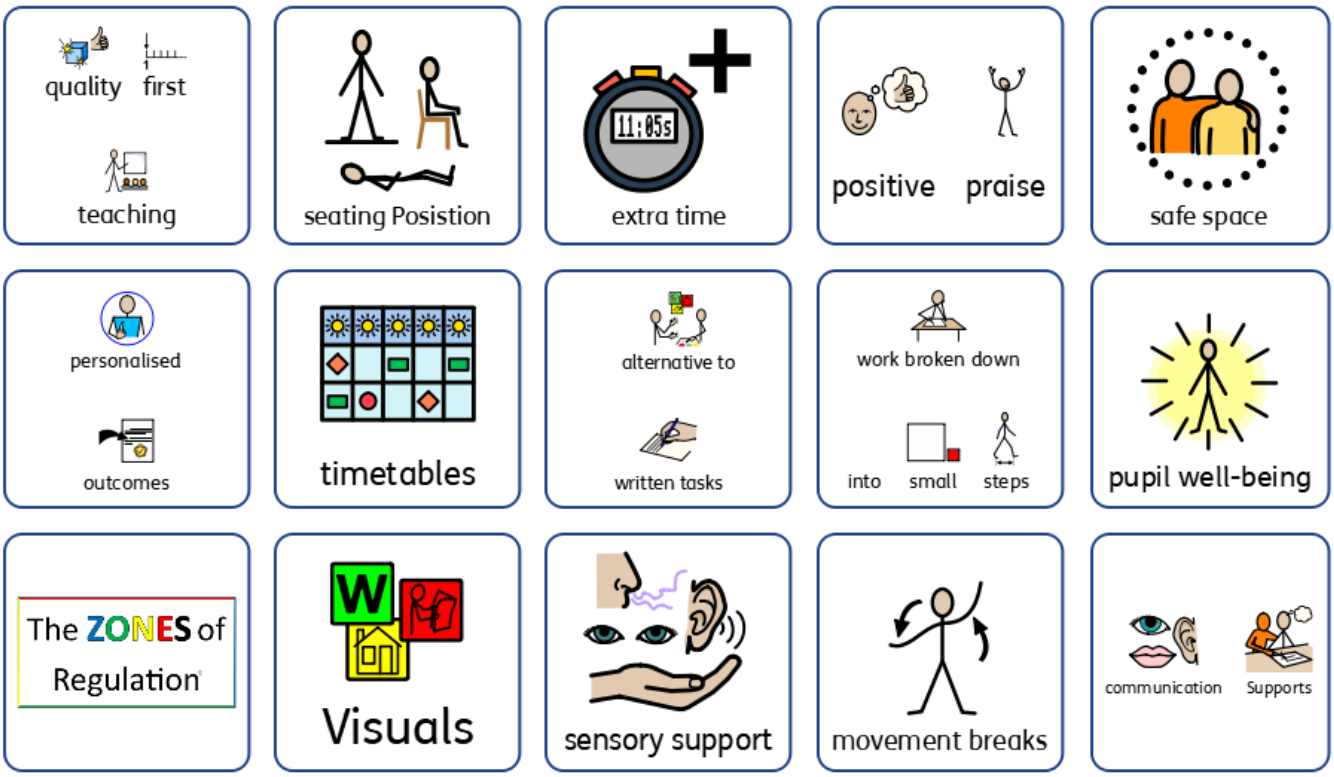
DYSART OUTREACH

NARROWING THE GAP
THE MINIMUM CLASSROOM STANDARDS

We know that there are a number of key things that the environments affect.

- Behaviour
- Learning
- Independence and transitions

We want to give pupils every opportunity to succeed. Therefore, we recommend basing your classroom environments on 3 principles:

- Visual – they need to see where they should be and what the expectation is
- Structure and routine – The Physical environment provides structure and routine.
- Senses –bright lights or loud noises can make a difference to how they learn.


Expected Classroom Standards
